FEEDBACK S/N	PROGRAM	TITLE	CHANGE NARRATIVE
1300699	User Access	View Only Access	Creates and additional 'View' only access privilege for CAD, CAR, MIR, Ship CSI, Test, QALI, SPQ, Test, and SAP. This makes it possible for a person have search only capability and prevents creating new records or edit of existing records within a specific application. Other application access privileges have not been changed.
1300832	Attachments	Multiple Attachments Upload	Changes the web page flow to make it easier to upload multiple attachments to a single record.
1300895	PDREP	Ability to open more than one attachment	Saved attachments open in their own new window when clicked for viewing, so several attachments can be open at once.
1300948	RIMS	Add Marking Block on Main Page	Added "Marking" text block allowing up to 200 characters next to Remarks block on main page. Changed title of existing Remarks block from "Remarks/Marking" to "Remarks". Corrected block number from 40 to 46.
1400137	FOP	Preparation Date	On the FOP work list page, the "Preparation Date" will be blanked by default
1400754	PQDR	Display of Fields	Adds the Product Type and SYSCOM fields to the SF-368 Supplemental Data section for Army PQDRs, and Sub Category for all services PQDRs.
1400919	RIMS	Rims Search	Changed Percent MIC and Remarks blocks so they are searchable fields.
1400928	CAD	GSA and Non STD DOD Contract Formats	Revised the way the database validates contract numbers imported from WAWF and EDA to permit GSA contract data.
1401034	Contractor Profile	CAR	Adds Corrective Action Requests processed in PDREP to the contractor profile. (Does not include DCMA eTools CARs at this time)
1401049	FOP	NSEO Radio Button	Adds two radio buttons in the module to allow the QAR to differentiate between NSEO Administrated Supplier and Shared Supplier for each record.
1401050	FOP	Facility/Contract Based Buttons	Defaults the Facility and Contract Based radio buttons to "Both" for FOPs.
1401054	QALI/LOD	New Template	Modifies the QALI/LOD attachments for inspection requirements. Updates module to work with new QCL.
1401143	FOP	CAGE Code Greyed Out	After an FOP is established, the CAGE is no longer editable and the user may view active and inactive records.
1401206	SDR Interface	Redirect Logic	Updates logic used when redirecting an SDR to a new Action Point DoDAAC so that when a RIC is unknown, the DoDAAC is sent to WebSDR instead.
1401463	RIMS	Search Results Date Sorting Incorrect	Corrected sorting of search results of columns: Cert Recd Date, Mat Recd Date, Super Signed Date in RIMS Search tab.
1500282	RIMS	Add New Role Nuc Expediter	Added new Supply access level to support material screening and assessment performed by code 2305.2. Read Only access to all RIMS data except: 1) Edit priority fields if box 45 (Supervisor Review) is null. 2) Edit record need by date if box 45 is null. Supply level can edit Stand Alone RIDL fields (similar to Inspector and Engineer level): Enter and complete RIDL Condition, Complete and Lock Resolution, Close RIDL, Who Has Next Action, Notify Individual, Add Attachment. Supply level needs to see all tabs except Create RIMS Record.
1500306	RIMS	Rims RIDL Auto Generated E-mails	Added Document Number field to auto-generated email text under "Notify Individual" button on RIDL menu.
1500342	FOP	Program Selection	This allows for any of the 13 Programs to be selected when creating a FOP. At least one must be selected.

FEEDBACK S/N	PROGRAM	TITLE	CHANGE NARRATIVE
1500347	Attachments	Attachment Labels	Updates labels in the Attachments module for consistency.
1500402	External Link	Broken Links Updated.	Updates links and URLs on the external links web page.
1500415	Report Email	Permit Apostrophe	Permits apostrophes in the email addresses when emailing from the Automated SQL Application.
1500431	PQDR	Support Point Suspense Table - Local	This updates the suspense table at Support Point issue (saved locally) similar to additional requisition numbers issue.
1500447	SDR	Add COG upon creation in SDR	Adds COG from NIIN on all SDR's in PDREP. COGs auto populate on import form WebSDR or when NIIN is input by user within the SDR Application.
1500464	RIMS	RIDL Report Format	Modified RIDL Report format so is similar to PQDR 368 format.
1500521	RIMS	RIDL Report Format and NOFORN Markings	Printed NOFORN markings at the top and bottom of multiple RIDL Report pages and fit all RIDL text on same page.
1500529	PQDR	842P 1007D Support Point Interim/Final Reply	This removes the interim reply and final reply options at the Support Point when PQDR is not at Support Point location.
1500541	User Access	Account Reactivation Update	After 30 days of user inactivity in the PDREP-AIS, user accounts are locked (not deactivated). Between 30 and 45 days users are prompted if they want to un-lock the account and follow on screen prompts to keep account from going inactive. After 45 days the users PDREP-AIS account is deactivated.
1500546	RIMS	Report Scheduler	Restricted scheduling of ADHOC reports that contained NNPI information.
1500548	GIDEP Webpage	Attachments Button	Add attachments button added to the GIDEP edit page.
1500556	RIMS	MFG Name - Create New Record	Removed the MFG name of previously viewed record when creating a new record.
1500561	PQDR	Previous Failure Count	Updates logic used to calculate the Previous Failure Count by NSN and by NSN/CAGE
1500564	RIMS	Expediter Cannot Set Priorities on RIDL's	Allows Expediter access level to view and edit priority fields of open stand-alone RIDL's.
1500573	PQDR	PDREP Automated Late Response	This sends an "Advanced" notice for DLA PQDRs, starting at 5 days before Interim Reply is due.
1500584	Material Profile	CAGE	Adds CAGE display to the material profile for contract deliveries of materiel.
1500589	RIMS	SARIDL Lock Out	Adds record locking functionality for stand-alone RIDL's so only one user can edit the record at a time.
1500590	RIMS	RIMS Record Locking - Back Editing	Removed ability to "back" into a locked record and allow editing.
1500596	Reports	Obsolete DLA Report	Removes the obsolete DLA Top Twenty report web page that used legacy CDCS data. DLA personnel now use the DLA PQDR Analysis Tool to locate the Top Twenty PQDRs for the category they are interested in.
1500599	RIMS	Nuclear QA Level	Displays nuclear QA levels as letters when exported.
1500631	PQDRII	PDREP Logging Clean Up BIC Logs In STDOUT	This moves PQDRII logging (error and access) to a separate log file. No affect to users.

FEEDBACK S/N	PROGRAM	TITLE	CHANGE NARRATIVE
1500635	RIMS	Wrong Signature Block Populated on MIR	Corrected signature block so accurate date is populated upon signing.
1500656	SDR Interface	Material Manager Code	Updates import logic to ensure the USMC Material Manger Code does not get used on Navy SDRs.
1500660	User Access Edit Webpage	Attachments Button	Add attachments button added to the user profile edit page.
1500661	User Access Archive	Adds User Access updates	Adds User Access updates to the archive of changed data and makes them searchable by PDREP Administrators. This tracking is not new functionality, only the search and display is.
1500686	User Access	User Access Forgot Password	Corrects logging error when using the password reset.
1500695	RIMS	Duplicate Document # Check (Case Problem)	Checked for duplicate document number and return error message "Duplicate Document Number Entered" if one is found. Did not restrict entering a duplicate document number if user so chooses.
1500710	RIMS	Receipt Inspection Record	Stopped My Action Block from defaulting to Code 120 when a record is closed.
1500712	SDR	SDR Worklist enhancement	Adds Ad Hoc feature to the SDR Module so personalized worklist may be created and saved within the SDR module.
1500721	RIMS	Description Block 14B Width	Made the width of the description block (14B) on the main screen so it matches the width of RFI tag when printed.
1500733	RIMS	RFI Tag - Bar Code Location & Shelf Life	Centered and enlarged the bar code under the stock number on the Level-I and non-Level RFI tags. Changed "Shelf Life" to "Shelf Life Exp" on non-Level RFI tag.
1500734	Data Entry Key List	Enhanced tracking of deleted records	Display added to the data entry key list web page to show when any record in the PDREP-AIS was deleted, when, and by whom. This tracking is not new functionality, only the display is.
1500744	RIMS	RIMS - RIDL's Requiring Action	Added "Download to Excel" functionality to RIDL's Requiring Action search results list.
1500749	RIMS	Who Has Action Date Is Changing	Corrected action complete date on Who Has Action screen. The action complete date was changing for previous entries when saving an action complete for later entry.
1500757	Weapon System Codes	Added Codes	Codes 'AS' and 'AQ' were added to the Army's weapons system code drop down selection
1500759	RIMS	RIMS Worklist - Button Error	Corrects error message in the log that happened when the user tabbed over the Display Worklist or Go To MIR buttons.
1500765	RIMS	SARIDL - Save The Document As Upper Case	Displays document number as upper case on the RIDL screen after saving a new RIMS record and tabbing out of the document number field.
1500772	SDR	Add CIIC code visibility	CIIC code is now display on splash page of SDR Application
1500775	SDR	Allow action point to change type code	Places a drop down for the SDRs Type Code on action point page.
1500782	RIMS	Add Email Address	Added "XSMIC_L_CONDITION@NAVY.MIL" email address to the NAVSUP group in Nuclear RIMS for all four shipyards so C9442 in Mechanicsburg can be notified.
1500783	RIMS	ADHOC - Up/Down Arrows Not Working	Corrected up arrow in the ADHOC screen so data element was not removed from the list after attempting to rearrange the order of the elements selected.
1500794	MIR	MIR: Prime Contractor Access	Permits Prime Contractor to access the MIR Application to view, create, and edit MIRs associated with their DODAAC/CAGE in their user profile. Limits access to all other parts of PDREP based on additional settings in the user's profile.

FEEDBACK S/N	PROGRAM	TITLE	CHANGE NARRATIVE
1500797	RIMS	Add MIR Established Banner To Set Priority	Checked to see if the Document Number in Set Priority tab is already used in an MIR. Display "xxxxxx has been established with document number xxxxxxx" if the MIR has already been established.
1500825	User Access	User Access Request	Updates data entry field sizes for email and state on the user access request form.
1500826	EZ MIR	EZ-MIR Worklist	Corrects issue so users no longer receive an error message when returning from the add/view attachments page to the EZMIR edit page.
1500845	RIMS	Database Errors	Corrected database error caused by users saving the record at the same time
1500846	RIMS	RIMS Search Screen Enhancements	Created a DoDAAC pick list for each DoDAAC and "All DoDAAC's" for associated screens. Added DoDAAC to search results for heat/lot, specification and MIC/RFI search screens. Added mandatory designator (M) to the heat/lot, specification and MIC/RFI search screens. Added the requirement of at least one search criteria on the NIIN/Contract and Doc/Project search screens.
1500852	RIMS	Add MIR Established Banner To Set Priority	Validates the sub-vendor CAGE code against the cage code table when creating a new RIMS record.
1500853	PQDR	Suspension Status Code Display	Realign Screening Point, Action Point and Support Point Suspension Tables to show first column "Suspension Code". Display in table in column: suspension code, hyphen, literal.
1500864	RIMS	Continuation Sheet - 20 Character Max	Changed the Continuation Sheet to only allow 20 vs.25 characters.
1500866	ARISE Web Service	Un-escaped Characters	Updates web service to account for un-escaped characters.
1500870	PQDR	Bypass Validations For Reopening Closed PQDRs	Updates validations to make it easier to reopen a PQDR. Reopening bypasses closing validations, places PQDR at Screening Point, set Status to AG, and removes Closed Date.
1500878	RIMS	Increased Length of Inspector Field	Changed the Inspector field to allow searching for seven vs. six characters on the Worklist screen.
1500897	User Access	User Profile	Corrects logging error when tabbing through fields on the user profile web page.
1500898	RIMS	RIMS Main Record Erroneously in Edit Mode	Removed ability to edit a record due to an error message of missing data where the user's DoDAAC does not match the record DoDAAC.
1500902	RIMS	ADHOC Links	Includes all RIMS links Worklist, Create New Record, Search, etc. at the top of the ADHOC page.
1500903	RIMS	RIMS Additional Help Link Error	Removed the Additional Help link from the main screen. Information is in the RIMS User Guide.
1500905	Contractor Profile	NASA Supplier Assessment	Adds NASA Supplier Assessments to the contractor profile
1500909	RIMS	Shelf Life Field Not Saving on the Non-Level RFI Tag	Displays the Shelf Life field on the RFI Tag. The data was saving but not displaying.
1500927	RIMS	SARIDL Document Number Check Upon Entry	Checks the Stand Alone RIDL Document Number to determine if previously existing. If the Document Number does exist, populate the remainder of the fields on the screen with the existing data.
1500929	User Access	Email notification	Email notification to AMCOM central mailbox when user access request submitted for W90BWX or W81D17.
1500959	RIMS	Stand Alone RIDL Instructions	Expands the instructions on the Stand Alone RIDL (SARIDL) screen for users to leave the Correspondence SN blank when creating a SARIDL. Entering anything in the Correspondence SN field creates a screening RIDL.

FEEDBACK S/N	PROGRAM	TITLE	CHANGE NARRATIVE
1500982	RIMS	Email Notice Warning	Displays warning on notify screen: This message will be sent out over NMCI Email and not to add NOFORN information if adding to the message.
1500983	RIMS	Delete HX Pick List Option	Deletes the HX pick list option in the RIDL type dropdown box in the RIMS RIDLS Requiring Action screen.
1500984	FOP	Scroll Bar	On the FOP search results, a scroll bar is added to see all of the associated data with the FOP record.
1500985	FOP	FOP Transfer Error	Updates the SQL to allow special characters to be used in names
1500991	RIMS	RIDL Metrics Not Saving	Updates metrics so they are associated with the correct Rev of the record.
1501004	RIMS	Cancelling an MIR	Allowed QTY REJ, QTY ACC, UNITS DEST, UNITS REJ and UNITS ACC fields to be zero when all attributes disabled.
1501007	QALI/LOD	CAGE Code and Contract number	Updates the CAGE cod autofill so user keeps place on web page after autofill, and updates the contract number validation.
1501012	QALI/LOD	Cancel Button Navigation	Corrects issue when clicking the Cancel Button in the PVI section of the QALI/LOD.
1501013	QALI/LOD	Attribute Default	Changes the default attribute setting to 'Select'.
1501036	RIMS	QA Review QDR Date Validation	Corrects a logging error when user entered "NA" in the QDR date field: Error updating RIMS_Final_Review record un-parseable date: "NA".
1501051	SDR	SDR Extract Logic	Updates logic to ensure a CO-Correction is sent vice a 11-reply when an originator saves a change to the original SDR.
1501057	RIMS	Remarks Sheet 1000 Character Max Limit	Limit the number of characters to 1000 on the remarks sheet and display an error similar to the RIDL page if a user enters more than 1000 characters.
1501105	PQDR	Action requested Code	Updates PDREP import and export of the Action Requested Codes
