PDREP-AIS Production Publish for 28 May 2025
PDREP-AIS Version: 6.0.33

Module	Software Change Request #	Summary of Change
AM	PDREP-265	Added capability to pull Part ID data based on a NIIN search. Field should be for entering text only, not a drop down like the previous fields.
AM	PDREP-260	Remove range and hull number from ship platform selector
AM	PDREP-200	Updated AM styling to match Stock Screening.
CAR	2500089	Ensure non-DCMA transfer page only looks at DoDAAC for populating records.
CAR	2401573	Added new fields on ACO Tab.
CAR	2401572	Updated to the Review CAR Tab.
CAR	2401426	Created automated notification for CARs that are past due.
CAR	2401425	Updated CAP field for non-DCMA CARs.
CAR	2401315	Updated Days Active column to use CAP Due Date when status is CAR transmitted.
CAR	2401291	Added Issuing Office DoDAAC to Worklist as search field. Keep existing DoDAAC as Originator DoDAAC.
CAR	2401255	Added CAR History and Correspondence to Ad Hoc Report.
CAR	2401243	Added "FORWARDED TO" DATES (TO REVIEWER, TO ACO, ETC) to the Ad Hoc Report.
CAR	2401241	Add 'Days Active' from the worklist to the Ad Hoc report.
CAR	2401221	Add CAR# and CAGE Code to subject lines, Standard top of email with CAR#.
CAR	2401114	Allow CAPs to be reopened if failed Verification or Validation.
CAR	2500471	Fixed issue sending delegations for HN.
CAR	2400527	Update the Send button on the Correspondence page to populate the forward to table and perform the actions that the current Add/Send next FS button is performing.
CIM	PDREP-78	508 compliance pt. 2 - CIM

Module	Software Change Request #	Summary of Change
ER	2400549	Fixes instance where user can get an error when entering and exiting the attachments page multiple times.
ER	2200018	Added Sub-Status for Screening Points for additional granularity of where the record is.
MIR	PDREP-79	508 compliance pt. 2 - MIR
MIR	2500301	Investigation of CAGE validations in PQDR that are derived from MIR.
Other	PDREP-384	Updates Ad Hoc and user logging - invisible to users
Other	2200649	Updates Tomcat Arguments for V17.
Other	1900225	Fixes possible vulnerability. Transparent to users.
Other	2401296	Upgraded handshake security procedures for PDREP AUTO. Transparent to users.
Other	2401246	Implement character validation and user notification across PDREP applications.
PQDR	2500435	Added additional sort capability to the POC drop down in force promote.
PQDR	2500304	Addresses null pointer as a Prime user submitting to Screening Point.
PQDR	2500302	Updating CAGE functionality when imported from MIR
PQDR	2500235	Reinstate QDR_Notify.
PQDR	2500167	Added increased visibility to cancelled records within history pages.
PQDR	2500143	Create database structure for WebPQDR
PQDR	2500137	Remove N45112 special access in PQDR application.
PQDR	2500106	Addresses back-end literal limitations to DB sizing on the specification table.
PQDR	2401478	Updated display of POC name to allow for longer names.
PQDR	2401287	Implement a null check for Support Point activity for correspondence email dropdown (generate letter); N45112 should act as all other DoDAAC activities (i.e. Screening Point/Support Point)
PQDR	2401216	Refinement for ADC 1007E cancellation reason code added on 2300920.
PQDR	2401172	Improvement to page refresh actions on Action Point pages.

Module	Software Change Request #	Summary of Change
PQDR	2401088	Updated GIDEP processing to accept 01-PRIVATE CONTRACTOR.
PQDR	2400906	Added contractor correspondence to history page.
PQDR	2400724	DLA CAT 3 PQDRs display as cat ii in the application worklist.
PQDR	2400459	Removed Navy specific items from non-Navy SF368 input screens.
PQDR	2301681	Update to accommodate long CAGE / DODAAC names.
PQDR	2101836	Updated Prime Contractor worklist visibility per access permissions.
PQDR Interservice Interface	2401576	Create new PQDR interface between PDREP and DAAS as per ADC 1007E. Work in Progress.
QALI/LOD	2500246	Data Update of old LODs for Delegation Type.
QALI/LOD	2500237	Adding New FMS Case Numbers to LOD.
QALI/LOD	2500228	Updated how RGQA pulls Contract and Subcontract numbers. Removed Nulls and concatenate Contract and order numbers. Update XSLT files.
QALI/LOD	2500184	Change Surveillance Category "PROCESS EVALUATION" to "SYSTEM/PROCESS EVALUATION" and add 5 values to Frequency dropdown.
QALI/LOD	2500153	Add AUSTRALIA, FINLAND, JAPAN, REPUBLIC OF KOREA, and SWEDEN as Host Nations to table.
QALI/LOD	2500145	Update values to be able to save data values to saved, Ad Hoc reports.
QALI/LOD	2500120	Updated contract complete button to check the Concatenated Contract column in the QALI _Contract table.
QALI/LOD	2500044	Remove error from SF-EN-ECP1- Receiver is authorized to concur/nonconcur with Subcontractor's Classification/Disposition of Minor ECPS.
QALI/LOD	2500030	Updated auto notifications to account for end of the year.
QALI/LOD	2500029	Update buttons and calendar field for delegatee requirements section.
QALI/LOD	2401563	Active delegatee fields in rejected and withdrawn statuses.
QALI/LOD	2401562	Add CAGE code validation message

Module	Software Change Request #	Summary of Change
QALI/LOD	2401561	Removed duplicate form saved successfully message on RGQAR form. Change the text color at the bottom of the page for the PDREP version to white instead of black.
QALI/LOD	2401560	Add (M) labels to the Sat/Unsat and Date Required Actions Complete fields.
QALI/LOD	2401559	Ensure the Current Delegator column is being used in correspondence and not the Submitter.
RIMS	PDREP-382	Updates a RIB Criteria item per request
RIMS	PDREP-263	Updated a RIMS record status per request.
RIMS	PDREP-220	Updates RIB algorithm to properly pull ACTIVE status records when a subsequent revision is still in IN-PROCESS status
RIMS	PDREP-204	Added group mailboxes for Pearl Harbor Nuclear users.
RIMS	2500221	Removes a RIB revision initiated out of order per NAVSEA 06M.
RIMS	2500057	Further refinement of the RIDL search screen.
RIMS	2500040	Updated RIMS dropdown value.
SAA	2500128	Populate already-created dissemination fields with user profile data.
SAA	2401267	Add question type for scored audit.
SAA	2401265	Creates process checklist dropdown pull the checklist from the user's available checklist.
SAA	2400026	Added Audit Answer page where answers are recorded as data points.
SAA	2400022	Make checklists printable pdfs.
SAM	PDREP-186	508 compliance Pt. 2 – SAM.
SAM	2500232	Updated warning message for clearing contract CAGE data to display in fewer and more appropriate scenarios.
SAM	2500130	Fixing a bug on SAM SAD: RCN DoDAAC is disappearing after corrective actions are entered.
SAM	2401511	Updated search features to RIMS RIDL search. Like APL/QPL and SAD.
SAM	2201381	Added QTY Field and provided the information in the block to the right of "LAB TEST REQUIRED" on the pdf.

Module	Software Change Request #	Summary of Change
SAM	2200276	Fixed issue with SAD resolution check box.
SAM	2200124	Added checkbox "Shipyard Caused" to SAD form.
SDR	2500332	Updates DB trigger that assigns QDR-related group inbox as Action Point to SDRs that have been redirected.
SDR	2500132	1474, Security Assistance Customers Supply Discrepancy Report Stock Screening Reply Codes.
SDR	2500108	Updated Material Designator Code POCs for Marines SDR routing.
SDR	2500090	Displaying SDR status on SDR landing page as well as adding the cancelled date to the SDR view.
SDR	2401578	Fixing case where local stock SDR imports are not adding LSN/NICN.
SDR	2401568	Updating SDR imports from WebSDR to be run hourly.
SDR	2401558	Discontinues use of Discrepancy Code T7 and Adds Code Q9.
SDR	2401553	Updating Prime Contractor worklist with User Code, Date Range, and RCN filters.
SDR	2401520	ADC 1473 - Specifying 3 Disposition Codes as Interim Reply Codes.
SDR	2401519	Adds new WebSDR Rejection Codes and includes other Disposition Code Literal updates.
SDR	2401485	Fixed bug where reconsideration could process after an SDR completion.
SDR	2401152	Capturing work towards generating SDR rejections to WebSDR in response to invalid transactions.
SDR	2401029	Systematically Populating DLA Cause Code on Info-Only Type 9 SDRs.
SDR	2300788	SDR exports to WebSDR for all internal SDRs
SP	2500444	Update SP View Access functionality.
SP	2500253	Updated Rescheduled Records Associated Occurrences to display as the Reassigned Record Owner.
SP	2500236	Updated Record Owner from TMARD to RREAV on provided Record UIDs and any associated DRAFT IDRs.
SP	2500189	Implementing global DISA F5 rules in SP.
SP	2500166	Updating spelling for two SP Ad Hoc data elements.

Module	Software Change Request #	Summary of Change
SP	2500135	Update KCR view to allow full sub-tier RCN/DCN without decimals or dashes to be linked to SP.
SP	2500111	Update data field label.
SP	2500085	Updating the existing display on the KCR table page.
SP	2500054	Restored SP Ad Hoc data element of "KCR Risk Rating" to the alpha & beta environments.
SP	2500036	Add a date/time stamp to the KCR table denoting when a modification (addition, edit, or removal) occurred, along with a visual indicator of such action.
SP	2500020	Updated how the code restricts record editing on plans marked as archived.
SP	2500006	Updated of SP user guide(s).
SP	2401587	Investigation related to KCR view for CAGE code U9897 SP CS KCR CS-0002.
SP	2401586	Corrected issue with SP Ad Hoc error for "Rec. Add. Func. SP" update label to "Rec. Joint SURV. Team".
SP	2401585	Corrected error associated with Ad Hoc data field "REMOVE REC. ASSOC IDRS".
SP	2401484	Updated QA KCR's previously not captured in the finalized document DCMA submitted for Jan 2025 & May 2025 publish.
SP	2401397	Removed status requirement when linking RCN/DCN to SP KCRs.
SP	2401323	Completion of QA KCR updates.
SP	2401116	Update Supervisor role to be based on DoDAAC.
SP	2401115	Expanded full user role.
SP	2401113	Expanding on Team Lead Non-Supervisor access capabilities.
SP	2401112	Database and front-end changes to how KCR's are updated as well as additional tool requirements related to updated process.
SP	2401093	Updated SP scheduler package.
SP	2400999	Removal of data dictionaries from existing SP User Guides & creating separate SP Data Dictionary pdf.
SP	2400913	Adjusting IDR duplicate rows in SP Ad Hoc.

Module	Software Change Request #	Summary of Change
SP	2400517	Identify duplicated value and reduced Ad Hoc return.
SP	2400485	Updated Risk Trend Ad Hoc.
SP	2400327	Add 10 data elements to the KCR Risk Trend dropdown. Add weekly update on Mondays of Materialized View to Reduce Latency.
SP	2400241	Update Ad Hoc Scheduler dropdown to populate the data field "SO Overdue".
SP	2301629	Implement A "KCR LAST UPDATE" data field.
Special Quality Test Survey	PDREP-77	508 compliance Pt. 2 - TST, SRV, SQD
SRS	2500251	Reviewed and updated trend analysis data as needed so report can display as expected.
SRS	2500146	Updated DSM schedule counting logic to remove unnecessary contract number match from the DSM contracts table.
SRS	2500141	Add 3 additional columns to the CAGE profile delegation drill down.
SRS	2500100	Removes CAPs from being counted in SRS if they do not require a response.
SRS	2500099	Using CMO DODAAC from Prime CAGEs for contracts in the SRS Contract and Program Level Risk displays that do not have CAD Module entries.
SRS	2500038	Manual Update of DSM Data.
SRS	2401500	Adds Place of Performance Contracts for SRS Index Calculation.
SRS	2401273	Add Disapproved Business Systems Drilldown to SRS CAGE profile.
SRS	2401271	Adding Delegation-Specific CAGE drilldown table in the SRS LOD/QALI Report.
SRS	2401011	Updates to inputs for SRS Reports.
SRS	2400976	Updated CAR Count Drilldown to include Place of Performance Location CARs.
SSR	PDREP-91	Added Type Inspection Code "O" for "Other" for Navy records only per the FRD
SSR	PDREP-76	Fix issue with the worklist when resizing the screen.
SSR	PDREP-75	Added RCN as a search parameter to the Search page.

Module	Software Change Request #	Summary of Change
SSR	PDREP-38	Adds data description tooltips to the Forwarding Screen & Send Message page
SSR	PDREP-37	Adds data description tooltips to the Disposition Page
SSR	PDREP-36	Adds data description tooltips to the Screening Point Screen
SSR	PDREP-35	Adds data description tooltips to the Originator Screen
SSR	PDREP-331	Adds the Location field to the database to support PDREP-158
SSR	PDREP-261	Entered worklist and search criteria should not have to be capitalized
SSR	PDREP-252	Change the grey pie icon associated with incomplete NSN data
SSR	PDREP-251	Hide NSN detail headers
SSR	PDREP-250	Limit Screening Point quantity fields
SSR	PDREP-249	Allow Screening Points to fix saved NSN data
SSR	PDREP-248	Updated Screening Point data entry to prevent saving invalid CAGEs.
SSR	PDREP-243	Fix screening point email notification.
SSR	PDREP-242	Ensure Screening Point receives an email notification of a newly submitted record by the Originator
SSR	PDREP-235	Updates Admin role for SSR to enable deletion of draft records.
SSR	PDREP-218	Adds data descriptions into the database to use for hover-over definitions on the user interface
SSR	PDREP-217	Removes hardcoded values in the code and replaces with values representative of the user performing the actions on the disposition page.
SSR	PDREP-216	Add missing FK constraints to SSRREPLYITEM* tables
SSR	PDREP-203	Fixes Edit view of NSN Details for the Originator to properly show previously saved data.
SSR	PDREP-199	Add Back button to SAD Actions page
SSR	PDREP-194	Create unique button IDs corresponding to each button to allow selenium java to obtain the component in the quickest way possible
SSR	PDREP-187	Updates history logging for SSR records for consistency

Module	Software Change Request #	Summary of Change
SSR	PDREP-171	Fixes case where SADs could be unilaterally unlocked.
SSR	PDREP-159	Fixes the case where Screening Points should be able to report 0 QTY of a particular NSN.
SSR	PDREP-158	Moves the Location field to the NSN area for Screening Points and increases the field length
SSR	PDREP-150	Adds record history report for the Stock Screening app for admin use
SSR	PDREP-398	Prevents display of NSN options where QTY Reported = 0 on the Disposition page.
SSR	PDREP-405	Increased character length for the requisition field to support requisition suffixes.
User Access	PDREP-247	Added PIEE Roles for user access for Supplier Audit and Assessments module and Warranty module to PIEE PDREP interface.
User Access	PDREP-266	Updated job series codes and literals to more closely match OPM values
User access	2500442	Have selections for SSR show on PDREP admin processing page.
User access	2500349	Update SPPI Bulletin database trigger.
User access	2500347	Make job title series visible to all SYSCOMs.
User access	2500308	SYSCOM 12/32-bit update in user profile.
User access	2500303	Super go for DCMA vertical lift.
User access	2500292	Update SAAR form for other Gov't - SYSCOM 10.
User access	2500287	Update SAAR form for USMC.
User access	2500280	Update SAAR form for DLA.
User access	2500279	Update error message for signature not captured.
User access	2500191	DLA CAD Access-View vice Non-Management.
User access	2500154	Remove helpdesk email and phone number from User Access emails that are sent out from PDREP.
User access	2500098	DoDAAC needs to apply to user profile as processed.
User access	2400765	Removes display/edit capability of the activity head title from user profile edit page.
User access	2301728	Adds the "Logo" and "Default Application" to the PDREP Admin User Profile web page.

Module	Software Change Request #	Summary of Change
User access	2500443	Have SDR show on ACR as reflected in user profile.
Warranty	PDREP-332	Make a series of quick fixes for minor inconsistences found in the Warranty PDREP 7.0 Upgrade - Details Page. See Description block for more details.
Warranty	PDREP-257	Modified Warranty code to utilize Angular 19 conventions to make it easier to maintain moving forward.
Warranty	PDREP-156	Creates API to return Warranty and SORI details for usage on the Details screen.
Warranty	PDREP-155	Creates the base webpage for the Warranty & Source of Repair Details information to be viewed.
Warranty	PDREP-153	Creates the base webpage, including Search Fields and Table Return for the Warranty and Source of Repair Search
Warranty	PDREP-152	Creates API calls for the Warranty Search screen
Warranty	PDREP-146	Refactors the Warranty and Source of Repair Details pages into a singular page and upgrades to the PDREP 7 environment.
